e-Prosecution System

A Comprehensive Case and Document Management System
For Prosecutors' and District Attorneys' Offices

Completely integrates case management, document management and all prosecution functionality from screening to final sentencing.

The InfoShare™ e-Prosecution application completely integrates case management and document management, while streamlining processing for every aspect of the prosecution case!

Customized in-boxes

Customized in-boxes for each staff member helps track assigned cases through every event and status update at every stage of the case. No detail is lost!

Master Name Index

Master Name Index tracks all parties in the database, facilitating party entry, searching and linking parties to multiple cases.

Search Function

Complete search function by extensive criteria.

Scheduling / Calendaring

Complete scheduling and calendaring functionality with automatic notification to all parties.

Reporting

Full reporting functionality includes all regularly scheduled and on-demand reports.

Document Management

Comprehensive document management that is fully integrated with all phases of case management:

- > Individual and batch scanning of documents.
- > Advanced indexing and retrieval of documents.
- > OCR, bar coding and pdf conversion capabilities.
- > Document retrieval from within the case or through searching on document attributes.
- > Simultaneous access to documents by authorized staff members.
- > Using the robust InfoShare™ template generator, create your department's standard forms and letters, automatically embedded with current case data.
- > Designed to handle an unlimited number of documents, in most common file formats.
- > Enhanced security features are rules and permission-based, configured to the operations of your department.
- > Transaction audit reports are provided to track any change or inquiry to the case.

CSI also offers specialized modules to enhance the capabilities of the e-Prosecution case and document management system.

These are seamlessly integrated with e-prosecution and enhance case processing to meet the needs of your organization.

Choose the ones you need

Discovery:

Select documents for discovery, redact information as necessary and apply Bates numbering. Both the original documents and the discovery set are stored in the case. An e-discovery portal is also available for cloud-based delivery of discovery documents.

Investigation:

Powerful tools to input and track investigative data. There are various sub-modules that support the intricacies of specialized investigations such as arson, bias, burglary, computer forensics, pawn shop and sex crimes.

Intelligence:

Full functionality for storing, accessing and analyzing intelligence data (incidents, subjects, contacts, etc) with extensive ability to link and search for information.

Internal Affairs:

Provides prosecutors' offices and law enforcement agencies with a complete mechanism for receiving, investigating and resolving complaints of officer misconduct. Incorporates standardized, formal disciplinary forms commonly used by CALEA- certified departments in formal disciplinary actions, as well as your department's own internal paperwork.

Evidence:

Automates the storage and management of evidence, customized to fit the protocols of your agency. Evidence logs using barcode technology ensure accuracy in tracking the chain of custody.

Sex Offender:

Maintains and monitors sex offender data, providing prosecutors' offices and police departments with an extensive range of information for organized input, display, and search retrieval. Provides notification according to tier rating system.

Screening Module:

Electronically transmit complaints and all supporting documents from the local police department directly to the prosecutor's office. Save resources and improve data quality, while speeding up time to trial.

Forfeiture Module:

Tracks seized properties according to your state attorney general's guidelines, from point of seizure through property disposition and distribution of cash and/or property items to law enforcement agencies. Tracks all property, involved parties, events and status and automatically generates a quarterly report on seizures.

Motions and Appeals Module:

Manages all appeals and related motions filed in state and federal jurisdictions. Tracks filing dates and oral arguments, staff assignments with complete document management.

InfoShare's e-Prosecution System Manages
the Complete Life Cycle of the Case and Integrates
all Supporting Documents and Events
from the Arrest through Final Sentencing

Available interfaces between the Prosecutor/DA Offices, the police departments and courts for completely electronic submission of cases and documents

Customized modules support case processing according to your agency protocols and legal requirements

Security and access to case documents and information is controlled by your agency's administration

Attorneys and authorized staff can access data from anywhere they have access to the Internet.

With the InfoMobile mobile trial app, you can download your cases from the e-Prosecution system to your i-Pad and take them to court, make changes and then sync your changes back to the e- system
